

WE WANT WOLVES IN OUR TOMORROW.

We are the students of Timberline High School's TREE Club –
Teens Restoring Earth's Environment

Last year, eight wolf pups named after our school were killed on our public lands despite no livestock losses.

That pack was part of us, our identity.

Now it's gone.

Right now in Idaho:

- Newborn pups and their nursing mothers are being killed in their dens
- Whole packs are being slaughtered
- Over 500 wolves have already been killed
- Bounties of up to \$2500 for each dead wolf or pup

Your tax dollars are supporting this – this is not hunting, it's extermination.

Join us in asking the Idaho Fish and Game Commission to STOP THE RAMPANT KILLING OF WOLVES
